Experience the Power of Manulife UL's Rate Enhancement

With Manulife UL Client Investment Select clients can benefit from **higher returns on managed accounts within their policy, than they would earn on linked mutual funds in the retail market.**

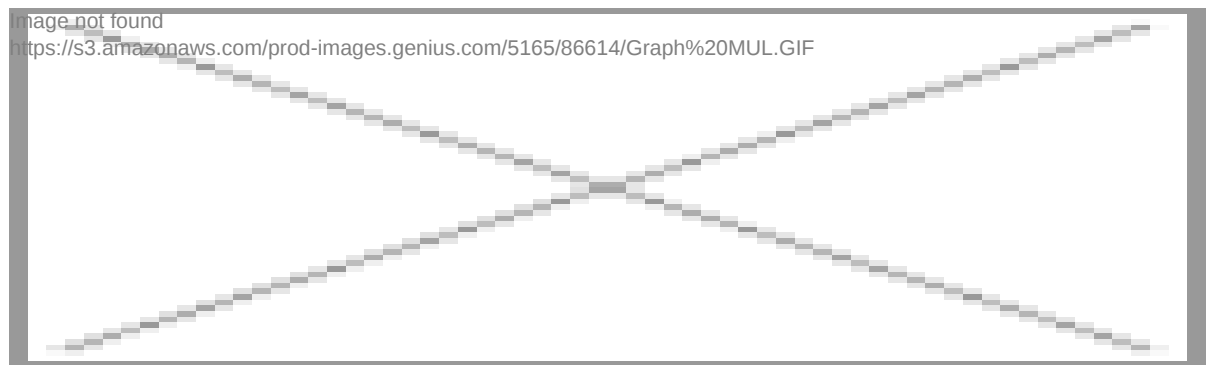

How is this possible?

Manulife is providing a rate enhancement to ALL Managed Accounts within Manulife UL Client Investment Select.

Equity and Balanced Managed Accounts benefit from a **1% annual rate enhancement** on the linked mutual fund return and Bond Managed Accounts benefit from a 0.25% annual enhancement on the linked mutual fund's return. For a full list of the managed funds [click here](#).

Plus, it's important to understand that Manulife UL Client Investment Select has a **rate enhancement INSTEAD OF a UL management fee**. This is a key differentiator when comparing Manulife UL with InnoVision Valued Client Bonus and the competitors' bonus options products. **This can make up to a 3% difference in your assumed illustration rate.**

See for yourself how the rate enhancement positively impacts the illustrated rate of your UL solution, especially when compared to other products with bonus options:
